## University of Phoenix Online

### College of Nursing and Health Services

The College offers working nurses opportunities to participate in degree programs developed to broaden their professional horizons. These programs are designed specifically for nurses who desire a repertoire of skills and knowledge necessary to respond effectively to today's dynamic health care environment. They also equip nurses with essential skills necessary to assume a leadership role in resolving the challenges being faced by health care organizations and personnel.

**Bachelor of Science in Health Care Services** The BSHCS major is designed to integrate a foundation of general education and applied sciences with the expertise that prepares the graduate for management positions in health care.

**Bachelor of Science in Nursing - RN to BSN** The BSN program is designed to develop the professional knowledge and skills of working registered nurses. The curriculum is built upon a foundation of biological, physical, and social sciences which contribute to the science of nursing.

## Masters Degrees

**Master of Business Administration/Health Care Management** The MBA/HCM is designed to provide students with the business management skills needed to manage successfully in today's

health care delivery systems. The MBA/HCM specialization is based upon courses in health care organizations, health care finance, quality and data base management, health care infrastructure, and health care strategic management.

**Master of Health Administration** The Master of Health Administration (MHA) program prepares leaders who can effectively respond to the dynamic and ever-changing health care industry. These individuals have a capacity to critically examine and evaluate issues and trends and are empowered to influence the destiny of the global health care system.

**Master of Science in Nursing** The MSN program is designed to develop and enhance the knowledge and skills of registered nurses. It is also designed for those nurses who want to pursue more advanced positions in today's challenging health care environment. The program blends nursing theory with advanced practice concepts necessary to successfully work within the structure, culture, and mission of any size health care organization or educational setting.

**Master of Science in Nursing/Master of Business Administration/Health Care Management** The MSN/MBA/HCM program is designed to provide nurses with a unique blend of advanced nursing and business management skills needed to manage today's innovative health care delivery systems.
